

LAPORAN EVALUASI PERENCANAAN DAN PENGADAAN OBAT TW 3 TAHUN 2022

PEMERINTAH PROVINSI SUMATERA BARAT RSUD MOHAMMAD NATSIR

Jl.Simpang Rumbio Kota Solok Telp. (0755) 20003 Faks: (0755) 20003
Website: www.rsudmnatsir.sumbarprov.go.id email: rsud.mnatsir@sumbarprov.go.id

KOTA SOLOK

I. Latar Belakang

Instalasi Farmasi Rumah Sakit merupakan bagian yang menyatu dari rumah sakit yang memberikan pelayanan farmasi rumah sakit. Di dalamnya terdapat proses yang terjadi antara lain perencanaan, pengadaan dan penyimpanan, distribusi, serta penggunaan. Pengadaan merupakan salah satu proses yang membutuhkan anggaran yang tidak sedikit dan bisa mempengaruhi dari efisiensi biaya rumah sakit. IFRS adalah satu – satunya bagian di rumah sakit yang bertanggung jawab penuh atas pengelolaan obat (Kepmenkes RI, 2004).

Salah satu cara melakukan evaluasi perencanaan dan pengadaan adalah dengan analisa ABC atau pareto. Analisis ABC mengarahkan pengembangan kebijakan mengenai prediksi yang lebih baik, kontrol fisik, keandalan pemasok dan persediaan pegaman (safety stock) yang lebih efektif. Analisis ABC atau Pareto adalah suatu analisis yang dapat digunakan dalam menganalisis pola konsumsi perbekalan farmasi. Dengan analisis ABC maka dapat membantu pihak manajemen menentukan pengendalian yang tepat untuk masing-masing kelompok obat dan menentukan obat mana yang harus diprioritaskan untuk meningkatkan efisiensi dan mengurangi biaya. Selanjutnya obat kelompok A yang harus diprioritaskan akan dihitung jumlah yang harus dipesan, waktu pemesanan, dan keefisienan pemesanannya.

II. Tujuan

1. Mengetahui nilai Pareto ABC sediaan farmasi dilihat dari nilai pakai dan nilai investasi di RSUD Mohammad Natsir bulan September – November 2022
2. Mengetahui sediaan farmasi yang menjadi prioritas dalam pengadaan sediaan farmasi di RSUD Mohammad Natsir bulan September – November 2022

III. PEMBAHASAN

Data yang diambil untuk mengevaluasi dari perencanaan dan pengadaan bulan September – November 2022. Total item obat yang ada 405. Berikut ini data perencanaan dan pengadaan obat yang dievaluasi :

PERENCANAAN OBAT GUDANG FARMASI RSUD M.NATSIR

IV. KESIMPULAN

Dalam analisis ABC terdapat tiga klasifikasi yang sering kali disebut dengan hukum 80-20 yaitu A, B, dan C yang didasarkan pada volume dollar tahunan. Adapun pengukurannya adalah dengan cara mengalikan setiap item persediaan dengan biaya per unit. Persediaan tipe A berisi 20% dari total persediaan dengan biaya total persediaan 70%-80%, persediaan tipe B berisi 30% dari total persediaan dengan biaya total persediaan 15%-20%, persediaan tipe C berisi 50% dari total item dengan biaya total persediaan 5%-15%. Dari hasil evaluasi didapatkan hasil sebagai berikut :

KATAGORI	ITEM OBAT	PERSENTASI DARI ANGGARAN
A	283	0,0 – 0,4 %
B	82	0,4 – 0,9 %
C	40	1 – 15,6 %

Hasil tabel diatas telah tergambar bahwa perencanaan dan pengadaan yang dilakukan di RSUD Mohammad Natsir telah sesuai dengan aturan perundang- undangan dan dengan adanya analisa pareto dapat memberikan gambaran untuk perencanaan dan pengadaan selanjutnya sehingga anggaran yang ada dapat dimaksimalkan sebaik mungkin.
